

Course programme

This is a 2 day simulation facilitator course which assumes some educational background, such as knowledge of principles of adult learning and learning cycles, is present.

WINNER

It is designed for all health care professionals with an interest in simulation, and how simulation can be used in the healthcare arena to enrich learning, enhance individual & team performance, and improve patient safety.

What attendees have said

Excellent course. Have learned so much about advanced communication which will be relevant in many areas of professional and personal life. Well organised and executed. Feel very much more able to facilitate scenario teaching.

Very good, supportive and great guidance from the faculty.

Very informative, specific and constructive and innovative. Very well organised course.

Well organised, very constructive and educational: my skills have developed as the course progressed. Thank you for all your honesty in alleviating our fears of incompetence.

Excellent hands on practice opportunity.

Introductory Facilitators Team Training Courses

The Introductory Facilitators Team Training Course is suitable for SHO's, fellows and consultants from all specialties, as well as nurses and allied health professionals interested in facilitating simulation courses at their own trust.

This programme utilises all of the facilities of SPRinT and provides knowledge of the principles of adult learning, learning cycles and how simulation complements multi-disciplinary team performance.

It is an intensely mentored course with video feedback for reflective learning. This course is applicable to paediatric and adult professionals.

Venue

Clinical Skills and Simulation Centre, Royal Brompton Hospital, South Parade London SW3 6LL
National Heart & Lung Institute, Royal Brompton Hospital, Dovehouse Street, London, SW3 6LY.
